

Botulinum Toxin

The 2.5 hour taster session is to give delegates a real opportunity to see if injecting is for them but without the big cost of more advanced and expensive training. The workshop will cover a 1 hour clinical lecture, 0.5 hour live demo, followed by a 1 hour hands-on training session; involving:

- The Use of Botulinum Toxin in Aesthetic Medicine.
- Anatomical Considerations.
- Preparation & Injection Techniques.
- To gain and understand the importance of accurate patient assessment from the initial consultation through to the actual treatment itself by watching live demonstrations.
- To understand how to carry out the procedures by undertaking a practical workshop in Botulinum Toxin (Hands on Workshop session).

Trainer:

Dr Bob Khanna is a Cosmetic and Reconstructive Dental Surgeon. He runs clinics in Ascot, Reading, Harley Street and Manchester, and carries out a full spectrum of treatments from Aesthetic Dentistry, Surgical Implantology and bone regeneration procedures. He was one of the first dentists in the World to venture into facial aesthetic procedures utilising Botulinum and dermal fillers over 12 years ago.
